

Wiedemeyer

Your Partner for Logistics

Our **warehouses** and **production facilities** have a total area of more than 20,000 m². They are characterized by excellent transport connections and good technical equipment.

So our halls are heated and allow piece weights up to 130 tons. The lifting capacity of our 12 indoor cranes is between 10 tons and 125 tons, the hook height is 10 m. The ceiling height reaches 14 m, the hall doors have a width of 6 m and a height of 5 m. The availability of office and common rooms including fax and telephone connections, toilets and a large open-air warehouse is natural for us.

A renowned packaging company has been working in our halls for many years. This enables us to offer you the taking over of your unpackaged machinery and equipment, the transport to our warehouses and the subsequent packing by experienced professionals. Also possible is a temporary storage in our warehouses and the following transport to your customers or to the European ports.

- Heated production and storage facilities with a total area of more than 20,000 m²
- Storing up to 130 tons piece weights
- Modern cranes (10 tons to 125 tons)
- Availability of office and common rooms including fax and telephone terminals, e-mail, toilets and sanitary facilities
- Excellent transport links to the A 1 and A 43/44
- Use of a reputable packaging company
